

# Vintage 2017

**Established:** Separated from Château Figeac in 1879, the estate is located between Château Cheval Blanc and Château Figeac on Pomerol border.

**Owner:** Otto Rettenmaier family

**Director:** Pierre Blois

**Consultant:** SARL Derenoncourt – Julien Lavenu

## VINEYARD

**Surface:** 14.6 hectares

**Soil:** Gravel and sand on a substratum of clay

**Method:** Principally biodynamic technics since 1997

**Average age of the vines:** 35 year

**Method:** The vineyard has been driven ecologically from 1997 with mainly the use of organic and biodynamic farming methods. In fact, we use not only herbal teas but also preparations such as the 500 and 501 that contribute to a better balance of the plant in its ecosystem. Cereals are sown in the inter-rows during the off-season in order to feed and strengthen the soil structure and thus to limit erosion.

## VINIFICATION

**Type of tank:** Stainless-steel tanks and wooden vats under temperature control

**Method:** After a meticulous sorting, the grape are destemmed. The berries, without being crushed, are transferred by conveyer belts in tanks of small capacities.

A soft extraction by punching down is practiced on all tanks. Maceration and fermentation last approximately one month.

The wine is aging in barrels 50 % of them are new.

Filtration and clarification are done if necessary.

## HARVEST 2017: THE YEAR OF FROST

**Weather forecast:** The vintage 2017 is characterized by high average temperatures and by deficit of rain.

After a rather dry winter, with a spring in February, the bud-break began from the beginning of April. An early vintage announced.

Unfortunately, after three nights of frost on April 20th, 27th and 28th, we could only notice the damages! On our 14.60 hectares less than 1.5 hectares were able to be saved: our best plot of land partially planted in Merlot and mainly in Cabernet Franc.

Thanks to a sunny summer, the grapes saved could be harvested in really good conditions. It was our fastest crop (2 days).

### Date of the harvest:

- Merlot September the 20<sup>th</sup> 2017
- Cabernet Franc September the 28<sup>th</sup> 2017

### Yield:

- 10 barrels 40% of whom are new
- 22.50 hl, equalling 3 000 bottles

**Variety in the blend:** 20% Merlot- 80% Cabernet Franc

**Alcool:** 13.5 % by vol

**WEINZEITUNG**

"...Feines Bouquet, Rauch, Kräuter, blumen, Kirsh. Gute Dichte, zart adstringierend, feine Säure, viel Kirish, Himbeeren im Finish..."

17/20

*Yves Beck*

Non vous ne vous trompez pas, l'assemblage est bien composé de 80% de Cabernet Franc et 20% de Merlot. Une première pour la Tour Figeac... et un choix de la nature suite au gel. Le bouquet est invitant et révèle des notes de violettes et de menthe. Touche fumée et nuances de baies rouges. En bouche le vin est fin, structuré et bien soutenu par son acidité qui lui confère de la fraîcheur tout en soutenant l'expression aromatique.

La nature peut être cruelle mais ici le résultat met du baume au cœur.  
2022-2034

90/100

**JAMESUCKLING.COM** 

A tight and pretty St.-Emilion that shows a medium body, soft tannins, fresh acidity and a medium finish

89-90/100

Très avantageux et disponible, il offre beaucoup de douceur dans la texture, de charme dans les arômes crémeux et floraux. Encore une fois très pomerolais !

16,5/20
